

CNC Angle Steel Production Line

CNC Angle Steel Production Line Performance Features:

Fully automatic angle steel flange production line, or CNC angle steel flange production line, is mainly for punching and cutting duct angle steel flange. The machine are designed to feed, punch, cut automatically in order to save labor improve efficiency. It's very fast, accurate and highly automatic.

Performance features of CNC Angle Steel Production Line:

Model	Working range	Dimension(mm) L*W*H	Power(kW)	Weight(kg)
JG-50	30/40/50 angle steel	3600*1100*1400	5	900

CNC angle steel production line is CNC angle steel flange iron pipe production line flange punching shearing machine, It is a versatile machine and change a variety of models to meet different duct shapes made of bone type, rolling wheels can freely change according to customer requirements. All mechanical gears, shaft rolling wheels are made of high quality steel, through the high-frequency, carburizing, quenching and other processes, to ensure mechanical durability, quality and stability, easy handling, to meet the needs of different users. square duct angle steel flange machine, angle iron flange auto production line for sale. We are relentless in pursuit of customer satisfaction commitment: 48 hours of service to users in place. Users think of things we have to think that customers do not want to do we do, users of the products, service quality, reputation, firm. This device is widely used in duct manufacturing, and CNC angle steel production line machine is indispensable in the production of air duct, It can be a more perfect duct connection, BLKMA company have independent research and development institutions, with the domestic strong product research and development of skills. We are specialized in the exporting business with CE certification. Our products are widely exported so Southeast Asia, EU, South America, the Middle East and other areas & markets, with good quality, suitable price, comprehensive after-sales service. We are widely welcomed by customers and unanimously approved. Our company ambition is "Your success is that we pursue", It is also the company's entrepreneurial spirit, we are looking forward to domestic and overseas friends to visit. CNC angle steel production line machine is Fully automatic angle steel flange production line or CNC angle steel flange production line,

[BLKMA®](http://www.blkma.com)—HVAC duct processing machines supplier providing overall solutions

Is mainly for punching and cutting duct angle steel flange. The machine are designed to deed, punch, cut, automatically in order to save labor improve efficiency. It's very fast, accurate and highly automatic. This machine have 3 features, 1. It's controlled by servo motor and it's feeding dimensions are accurate. 2. It only requires to input the size of workplace, distance between holes and how many holes to punch when programming, which is very easy to operate. 3. The new design mold can complete the angle steel switching within 5seconds, with the durable punch.

The main imported configuration of CNC Angle Steel Production Line:

Beijing Huade+Hydraulic system from Taiwan.
Japan Omron encoder.
Cutter and punching die which are both made of Japan SKH51.
Servomotor-driven feeding system.

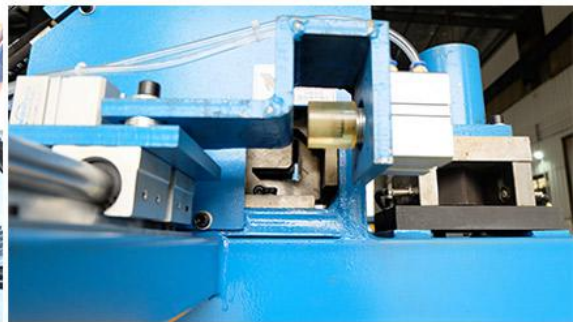

The basic configuration of CNC Angle Steel Production Line:

One motor
One electronic box
One electric control system
